

Growing up in St. Petersburg, FL, Jeremy Lomack 'Lomack', recognizes that the inspirations spawned from his city may not be what you would expect. The city's plethora of historic venues allowed him access to certain influences such as The Royal Theatre and The Palladium, where greats like James Brown and Louis Armstrong performed.

The influence of Lomack's church is deep rooted and gives him the drive to not only make great music but to touch souls while doing so. Lomack is unmistakably not just an R&B singer or a trapper turned rapper but an innovative artist that redefines dance, pop and rap music.

Lomack's beat production skills make him a cut above the competition and his lyrical content will leave you anticipating what subject matter he will attack next.

Lomack is currently working on his solo album and has many other projects coming soon.
